## ABOUT

I graduated from faculty of Economy in Syria after that I started my work as freelancer graphic designer in Beirut. I traveled to Jordan wich gave me a great oppurtunity to get my freelancing work as graphic designer to a hole new level after I participated in a training delivered by NEVADA Academy.

It improved my skills a lot and to have a real job.

After five years of working I beleive that I gained a good experience that put me among the proffesional graphic designers.
